AABE Hackathon

Energy Storage Challenge

Christopher A. Cavanagh,
Principal Engineer
Innovation and Developme

Energy Storage Challenge

Why?

- Enable Distributed Renewable Energy (Electric, thermal, other)
- Alternative to Expanding Energy Infrastructure
- Enable Clean Transportation (on and off road)

How?

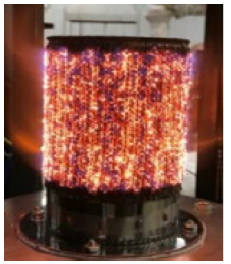
- New technology or new method (patentable?)
- Energy storage or easily stored new energy source
- Customer engagement and market animation

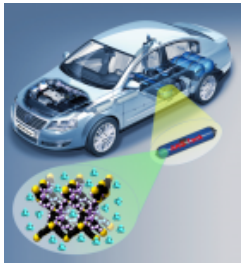
How Big?

- Any size above handheld (Large to small and scalable)

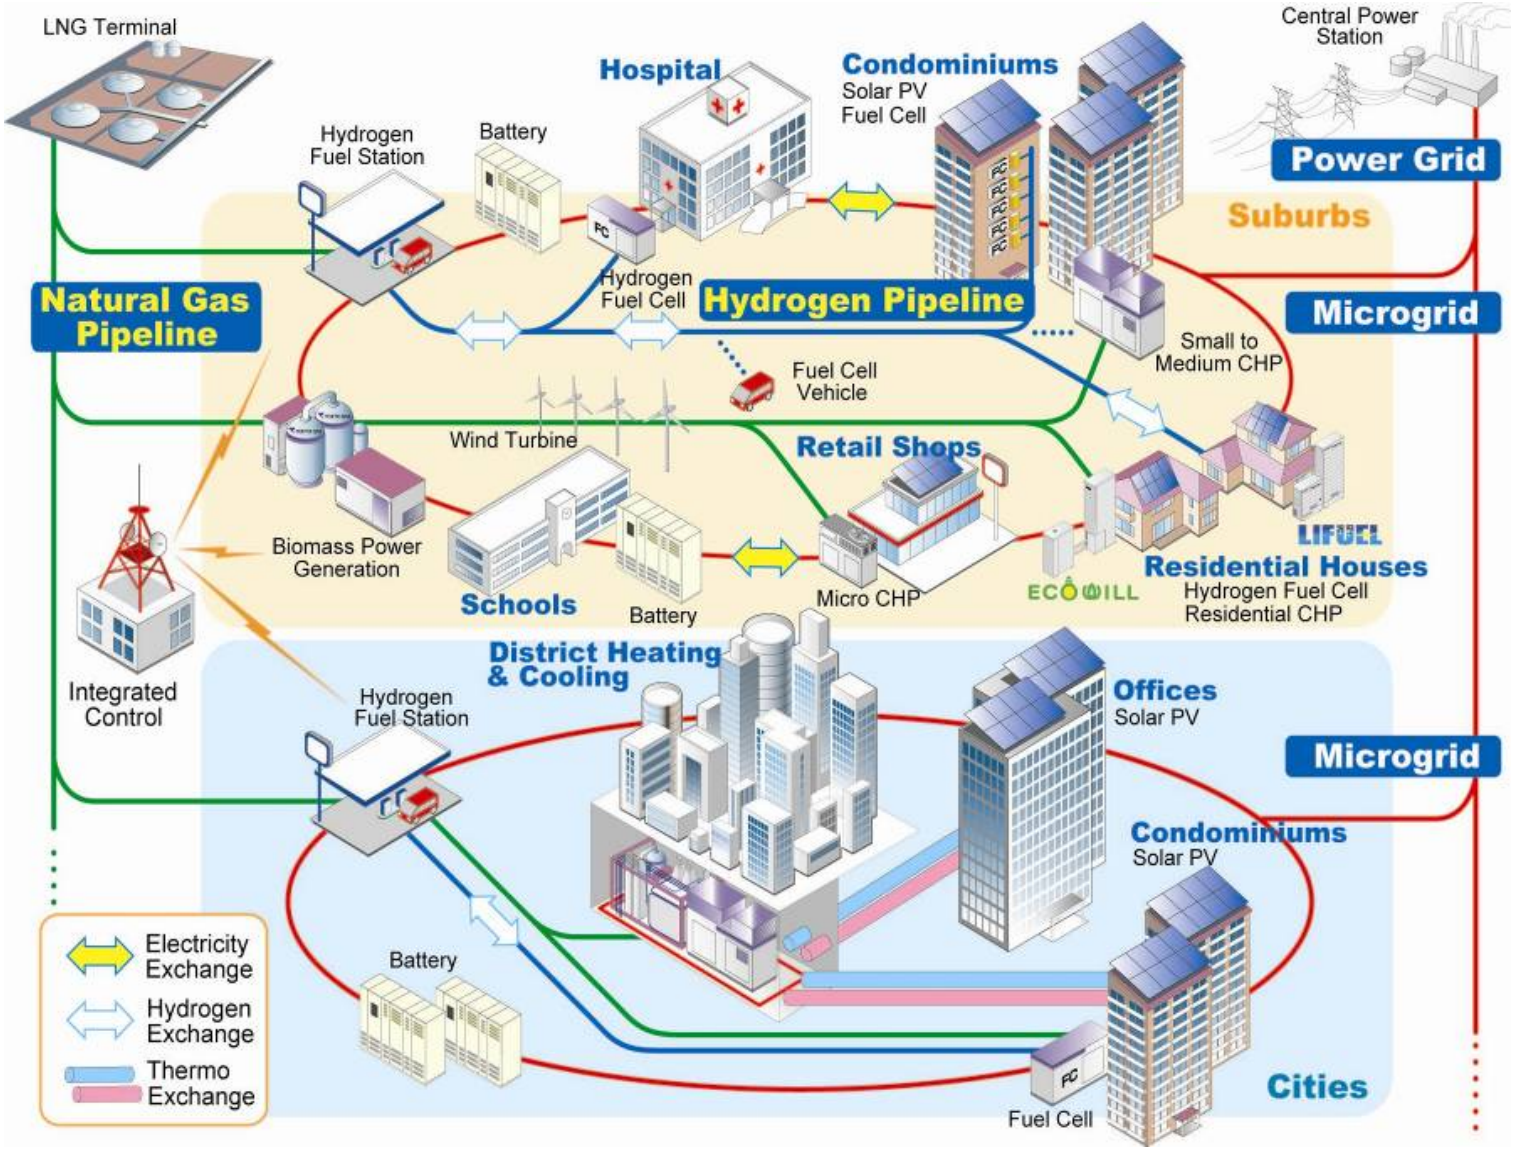
Objectives

- Safe and Clean
- Reliable
- Affordable





Tokyo Gas



"Sam" Muraki, Tokyo Gas
